

Kindergarten Education Scheme

School-based Learning Activity of Chinese Culture

Display Form

School: TWGHs Tin Wan (1996-1997 Directors) Kindergarten

2022-2023 School Year

Grade Level: K2

Name of Activity

Narcissus: Chinese New Year Flower

Objectives

- Introduce common flowers associated with Chinese New Year.
- Encourage the artistic creativity among our students.

Brief Description

Our teachers asked our students if they were aware of the date of Chinese New Year and what preparations were made to welcome the new year. Teachers then presented images or actual items related to Chinese New Year flower markets or festive decorations, emphasising the tradition of purchasing flowers to decorate their homes. This served as a segue to introduce students to common New Year flowers such as peach blossoms, narcissus, and kumquats. Each student was then provided with three pieces of green paper, which they cut along the dotted lines to create straight strips. These strips were affixed to green toilet paper rolls. Using glue, students attached yellow crinkled paper pieces to resemble the petals. Finally, the teacher assisted in placing the completed narcissus flowers onto floral-patterned paper plates.
